These risks, uncertainties and other factors include, among other things, those listed under the section titled “*Risk Factors*”, as well as those included elsewhere in this Letter of Offer. Prospective investors should be aware that a number of important factors could cause actual results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. SECTION II- RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Letter of Offer, including the risks and uncertainties described below, before making an investment in our Equity Shares. The risks and uncertainties described in this section are not the only risks that we currently face. Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business, results of operations and financial condition. Further, some events may have a material impact from a qualitative perspective rather than a quantitative perspective and may be material collectively rather than individually. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment.

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the effect is not quantifiable and hence the same has not been disclosed in such risk factors.

To obtain a complete understanding, you should read this section in conjunction with the chapters entitled "Business" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" as well as the other financial and statistical information contained in this Letter of Offer.

Unless otherwise stated, the financial information of our Company used in this section is derived from our restated consolidated financial statements.

The partly paid-up Equity Shares of our Company will not be traded with effect from the Call Record Date fixed for the determination of the Investors liable to pay at the First and Final Call. The holders of the partly paid up Equity Shares will not be able to trade in these shares till they are credited to the holders' account as fully paid-up.*

The Issue Price of Equity Shares of our Company is ₹ 25 per Equity Share. Investors will have to pay ₹ 12.50 which constitutes 50% of the Issue Price on application and the balance ₹ 12.50 which constitutes 50% of the Issue Price on the First and Final Call made by our Company. The Equity Shares offered under the Issue will be listed under separate ISIN for the period as may be applicable prior to the record date for the First and Final Call. The ISIN representing partly paid-up Equity Shares will be terminated after the Call Record Date. On payment of the First and Final Call in respect of the partly paid-up Equity Shares, such partly paid-up Equity Shares would be converted into fully paid-up Equity Shares and shall be listed and identified under the existing ISIN for the Equity Shares. Our Company would fix a Call Record Date for the purpose of determining the list of Allottees to whom the notice for First and Final Call would be sent. With effect from the Call Record Date, trading in the partly paid-up Equity Shares for which First and Final Call have been made would be suspended for such period as may be applicable under the rules and regulations. The holders of the partly paid-up Equity Shares will not be able to trade in these shares till they are credited to the holders account as fully paid-up Equity Shares.

3. *We have not identified any alternate source of financing the 'Objects of the Issue'. If we fail to mobilize resources as per our plans, our growth plans may be affected.*

We have not identified any alternate source of funding and hence any failure or delay on our part to raise money from the Issue or any shortfall in the Issue Proceeds may delay the implementation schedule of our Project-I and Project – II and could adversely affect our growth plans. For further details please refer to the Section titled “Objects of the Issue” beginning on page 56 of the Letter of Offer.

4. *If our Company's contingent liabilities materialise, its results of operations could be adversely affected.*

The Company's contingent liabilities as of September 30, 2016 and March 31, 2016 include matters pending in respect of income tax and capital commitments for pending contracts.

Sl. No.	Nature of Liability	Amount as on September 30, 2016 (₹ in Lakhs)	Amount as on March 31, 2016 (₹ in Lakhs)
1.	In respect of Capital Commitments for Pending Contracts	200.00	180.00
2.	In respect of Disputed demand for Income tax	4.85	4.85
	Total	204.85	184.85

If any of these contingent liabilities materialise, fully or partly, the financial condition of our Company could be adversely affected. For further details, please see “Financial Statements” beginning on page 125 of this Letter of Offer. If these or any other contingent liabilities materialise, the Company's results of operations could be adversely affected.

- 5. Our Registered office, corporate offices and the godown at Piplaj used by our Company for the purposes of our operations and business are on lease. Any termination of the lease agreements or failure to renew the lease could adversely affect our operations and business. Further, certain lease agreements entered into by us are not adequately stamped and have not been registered.**

Our Registered office and corporate offices and the godown at Piplaj are on lease from various lessors. Certain other premises used by us are also on a lease basis.

Our Registered Office is taken on long term lease from Gujarat Industrial Development Corporation vide Lease Agreement dated April 25, 2003 for a lease of 99 (ninety nine) years computed from May 28, 1992. Further, our Corporate Office is on lease from Ms. Archana Amin and Mr. Kandarp Amin through separate lease agreements dated April 1, 2010 for a period of 10 (ten) years and the Godown at Piplaj is also on lease from Mr. Kandarp Amin through separate lease agreement dated April 1, 2010 for a period of 10 (ten) years.

There can be no assurance that our Company will be able to successfully renew the lease agreements in a timely manner or at all. Further there can be no assurance that we will not face any disruption of our rights as a lessee and that such lease agreements will not be terminated prematurely by the lessor. Any such non-renewal or early termination or any disruption of our rights as lessee will adversely affect our business operations.

Further, some of these lease agreements, including that of our corporate office and godown at Piplaj, are neither adequately stamped nor registered. The potential consequence of this could be that in the event that there is any litigation over these properties in the future, these documents may not be permitted as evidence before a court of law. In case of any dispute in respect of these lease and license agreements before any judicial or alternative dispute resolution forums, the costs of dispute resolution could be extremely or prohibitively high.

We require certain statutory and regulatory permits, licenses and approvals in the ordinary course of our business and are required to comply certain rules and regulations to operate our business and failure to obtain, renew and maintain such statutory and regulatory permits, licenses and approvals or comply with rules and regulations, in a timely manner or at all may adversely affect our business, financial condition and results of operations.**

We require various statutory and regulatory permits, licenses and approvals to carry out our business and operations including environmental clearances and consents (cumulatively, the “Approvals”). A majority of the Approvals are granted for a limited duration and for a specific capacity and must be periodically renewed. We have applied for or are in the process of applying for such Approvals or their renewal. Further, our capacity for certain products varies at times to the Approvals. For further details, please see the chapter entitled ‘Government and Other Statutory Approvals’ beginning on page 171 of this Letter of Offer. While we have applied for some of these Approvals, we cannot assure you that such Approvals will be issued or granted to us in a timely manner, or at all. If we do not receive these Approvals or if we are unable to renew the Approvals in a timely manner, or at all, our business and operations may be adversely affected. Also variations, if any, to the Approvals, may entail action from the concerned authorities.

Further, the Approvals are subject to numerous conditions and there can be no assurance that the Approvals will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Suspension or revocation of the Approvals by the relevant regulatory authority, either on account of non-compliance or otherwise, would impair our Company’s operations and, consequently, have an adverse effect on our business and financial condition. Our Company may also be liable to monetary penalties and imprisonment. For further details, please see the chapter entitled ‘Government and Other Statutory Approvals’ on page 171 of this Letter of Offer.

Our Directors and Key Managerial Personnel are also interested in us to the extent of their shareholding, dividend entitlement.

10. Our profitability and results of operations may be adversely affected in the event of increases in the price of raw materials, fuel costs, labour or other inputs, and our commitments to deliver our products to our clients / customers are dependent on adequate and timely supply of key raw materials.

The cost of raw materials, fuel, labour and other inputs constitutes a significant part of our total expenses. Our manufacturing operations require various raw materials and packing material. The energy costs for operating our plants and other equipment also constitute a significant part of our operating expenses.

(Rs. in Lakhs)

Particulars	Six months ended on September 30, 2016	FY 2015-16	FY 2014-15	FY 2013-14
Input Cost				
Cost of material consumed	663.41	1,809.36	2,038.96	1,860.27
Purchase of Stock	808.29	1,752.26	2,278.68	1,892.25
Stores & other consumables	34.35	101.63	111.12	95.01

Our ability to pass on increases in the purchase price of raw materials, fuel and other inputs may be limited in the case of fixed-price contracts or contracts with limited price escalation provisions. Our actual expense may vary substantially from the assumptions due to unanticipated increases in the cost of raw materials, fuel, labour

or other inputs which may affect our business, financial condition and results of operations.

11. *Substantial part of our revenue is generated from export business. Our inability to sustain current levels of export business may adversely affect our business, financial conditions, results of operations and profitability*

Out of total sales (manufactured goods) of ₹ 3,266.73 Lakhs for FY 2015-16, export sale is ₹ 2,652.67 Lakhs which constitutes 81.20% of total sales. Out of total sales (manufactured goods) of ₹ 1,261.27 Lakhs for six months ended September 30, 2016, export sale is ₹1,036.74 Lakhs which constitutes 82.20% of total sales. Hence our inability to sustain the current levels of export business may adversely affect our business, financial conditions, results of operation and profitability. For further details, please refer page 85of the chapter titled “Our Business” of this Letter of offer.

12. *Our manufacturing process involves generation of hazardous industrial chemicals which entails significant risks.*

Our manufacturing facilities produce various hazardous industrial chemicals including organic solids, and organic liquids, which may be harmful to humans and the environment. While our Company believes that it has necessary controls and processes in place, any failure of such systems, mishandling of hazardous chemicals or any adverse incident related to the use of these chemicals may cause industrial accidents, loss of human life and/or environmental damage. If any industrial accident, loss of human life or environmental damage were to occur we could be subject to significant penalties, other actionable claims and, in some instances, criminal prosecution. Any such event would adversely affect our business, results of operations and reputation.

13. *There is a qualification remark in auditors’ report of our Company on Financial Statements for the financial year 2015-16.*

Our Statutory auditors have qualified the report on Financial Statements of our Company for the financial year 2015-16. Details are as here under:

Basis for Qualified Opinion

“The company had entered into derivative contract for sale of foreign currency with HDFC Bank Ltd. in financial year 2008-2009 which has resulted into loss to the tune of ‘ 1,97,52,367/- against which the sum of ‘ 55,06,598/- has already been paid to HDFC Bank Ltd. and charged to Statement of Profit and Loss in the aforesaid financial year. Consequent upon adjustment of fixed deposits amounting to ‘ 23,64,200/- against the balance loss of ‘ 1,42,45,769/- the liability on account of aforesaid loss, as per bank statement provided up to 31st January, 2013 stands to ‘1,47,07,069/- including interest, which has not been provided for by the company. Such non provision of liability has resulted into non-compliance of Accounting Standard 29 issued by Institute of Chartered Accountants of India and also resulted into understatement of current liabilities. Since the interest/charges, if any, for the period from 1st February, 2013 to 31st March, 2016 has not been intimated to company, the impact thereof on profit for the year under review could not be ascertained.

Had the observations made by us in Para above been considered, there would have been loss for the year amounting to Rs. 48,492/- as against reported profit of Rs.1,46,58,577/-, current liabilities would have been Rs. 16,85,89,488/- as against reported current liabilities of ‘Rs.15,38,82,419/-.”

14. *Some of our historical, legal and secretarial records are not traceable. Non-availability of these records exposes us to the risk of penalties that may be imposed by the competent regulatory authority in future.*

We do not have access to records and data pertaining to certain historical, legal and secretarial records and we have been not been able to locate many of our important corporate records. We have been unable to locate the copies of certain of our corporate records including but not limited to the secretarial record pertaining to the meeting for increase in authorized share capital from Rs. 5 lacs to Rs. 130 lacs in the year 1994 and details of allottees for allotment made other than cash for takeover of partnership firm M/s.Chlochem Industries in the year 1994. While our Company believes that these records were duly filed with the RoC on a timely basis, we have been unable to obtain copies of these documents, including from the RoC. Our Company cannot assure you that these form filings will be available in the future or that it will not be subject to any penalty imposed by the competent regulatory authority in this respect. If RoC initiates proceedings for any actual or perceived

irregularity in our compliance with reporting requirements in any future or historic periods, there may be an adverse effect on our business, results of operation and financial condition.

15. *Delays associated with the collection of receivables from our clients may adversely affect our business and results of our operations.*

There may be delays associated with the collection of receivables from our clients and distributors. As on September 30, 2016, ₹ 20.15 Lakhs or 1.93% of our total accounts receivable were outstanding for a period of more than six (6) months. Delayed collection of receivables could adversely affect our liquidity and results of operations.

16. *Our Company proposes to increase its products offerings. If we do not successfully commercialise our products or if our commercialization is delayed, our business, financial condition and results of operations may be adversely affected.*

Our future results of operations depend, to a significant degree, upon our ability to successfully commercialize additional products in our key chemical areas. To develop our product pipeline, we commit substantial efforts, funds and other resources towards formulations and development. Our planned investments in plant and machinery, equipment for future expansion could result in higher costs, especially in the event of cost overruns, without a proportionate increase in revenues. If we are unable to develop and manufacture new products or if the commercialisation of our new products is delayed, our business, financial condition and results of operations may be adversely affected.

17. *We are heavily reliant on our Key Management Personnel and persons with technical expertise. Failure to retain or replace them will adversely affect our business, results of operations and financial condition.*

Failure to retain or replace them will adversely affect our business. In order to successfully manage and expand our business, we are dependent on the services of Key Management Personnel, and our ability to attract, train, motivate and retain skilled employees, including technicians and other professionals. In addition, our business is technical in nature and requires personnel with requisite technical expertise. If we are unable to hire additional personnel or retain existing qualified personnel, in particular our Key Management Personnel and persons with requisite technical expertise, our operations and our ability to expand our business may be impaired. Further, we may be unable to hire and retain enough skilled and experienced employees to replace those who leave or may not be able to re-deploy existing resources successfully. Failure to hire or retain Key Management Personnel and skilled and experienced employees could adversely affect our business and results of operations.

18. *Delay in raising funds from the Issue could adversely impact the implementation schedule which may adversely affect our cash flow position, our business, results of operations and financial condition.*

Our Company's proposed objects of the Issue are to be funded from the proceeds of this Issue. Any failure or any delay on our Company's part to mobilize the required resources through this Issue or any shortfall in the Issue proceeds may delay the implementation schedule. Our Company therefore, cannot assure that it would be able to execute the proposed plans within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our cash flow position, our business, results of operations and financial condition. For details on schedule of implementation and use of proceeds see section "Objects of the Issue".

19. *Our operations are subject to varied business risks and our insurance cover may prove inadequate to cover our economic losses.*

Our operations are subject to various risks and hazards which may adversely affect revenue generation and profitability. While we believe that we have taken adequate safeguards to protect our assets from various risks inherent in our business, including by purchasing and maintaining relevant insurance cover, it is possible that our insurance cover may not provide adequate coverage in certain circumstances.

We maintain insurance including cover for machinery, boiler & pressure plant policy, business interruption (fire) policy, burglary (single location) insurance policy, fire & special perils policy, public liability (industrial risks) insurance policy and money insurance policy. While we believe that we maintain sufficient insurance

cover, certain types of losses may be either uninsurable or not economically viable to insure, such as losses due to acts of terrorism or war. Should an uninsured loss occur, we could lose our investment in, as well as anticipated profits and cash flows from the asset. In addition, even if any such loss is insured, there may be a significant deductible on any claim for recovery prior to our insurer being obligated to reimburse us for the loss, or the amount of the loss may exceed our coverage for the loss. Further, even in the case of an insured risk occurring there can be no assurance that we will be successful in claiming insurance in part or full, or the insurance purchased by us may be insufficient to cover the loss occasioned by the risk. Any loss that is not covered by insurance or for which we are unable to successfully claim insurance or which is in excess of the insurance cover could, in addition to damaging our reputation, have an adverse effect on our business, financial condition and results of operation. Further, an insurance claim once made could lead to an increase in our insurance premium.

- 20. *If we fail to keep pace with advancements in technology in the chemical industry, create intellectual property, or respond to changes in market demand or client requirements, our business and financial results could be adversely affected.***

The chemical industry is characterized by frequent advancements in technology fuelled by high expenses incurred on research and development. To meet our clients' needs as well as keep pace with our competitors, we regularly update existing technology and acquire or develop new technology for our chemical manufacturing activities. In addition, rapid and frequent advancements in technology and market demand changes can often render existing technologies and equipment obsolete, requiring substantial new capital expenditures and/or write-downs of assets. Our failure to anticipate or to respond adequately to advancements in technology, changes in market demand or client requirements could adversely affect our business and financial results.

- 21. *Our Company has entered into transactions with related party and may continue to do so in the future, which may potentially involve conflicts of interests with the Equity Shareholders.***

FY 2014-15	298.51	5,594.67	5.34%
FY 2013-14	442.86	4,932.52	8.98%

There can be no assurance that these transactions with such related parties have been entered into on an arm's length basis. Such agreements give rise to current or potential conflicts of interest with respect to dealings between us and such related parties. For further details, please refer to Annexure XXII titled "Restated Statement of Related Parties" in the Section titled "Financial Information" beginning on page 145 of this Letter of Offer.

- 22. *If our Company is unable to respond effectively to competition, our business and our financial condition may be adversely affected.***

We operate in a competitive business environment where in various small-scale manufacturers are giving stiff competition in certain products. Growing competition may subject us to pricing pressures and require us to reduce the prices of our products and services in order to retain or attract customers, which may have a material adverse effect on our revenues and margins.

- 23. *Our Company is subject to risks arising from interest rate fluctuations, which could adversely affect the financial results of our Company.***

As on December 31, 2016, our Company has outstanding term loans and working capital facilities to the tune of ₹ 2,006.16 Lakhs and ₹ 238.01 Lakhs respectively from Union Bank of India. Any increase in the interest rates could significantly raise the costs of borrowing adversely affecting the results of our Company.

- 24. *We are heavily dependent on machinery for our operations. Any break-down of our machinery will have a significant impact on our business, financial results and growth prospects.***

Our manufacturing facility is heavily dependent on plant and machinery. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. Further, while we believe that we maintain necessary supplies of spare parts and maintenance related equipment, if we are unable to procure the necessary spare parts in a timely manner or if we are unable to repair the malfunctioning machinery promptly, our manufacturing operations may be hampered which could have an adverse impact on our results of operations and financial results.

- 25. *The Company's ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.***

The amount of future dividend payments, if any, will depend upon the Company's future earnings, financial condition, cash flows, working capital requirements, the terms and conditions of the Company's indebtedness and capital expenditures. Any declaration and payment as well as the amount of dividend will also be subject to the constitutional and contractual documents including the Company's financing documents and applicable laws and regulations in India, including, in case of any final dividend, the approval of shareholders. There can be no assurance that the Company will be able to pay dividends in the future.

- 26. *We have not registered our Company's name or logo “ ” as a trademark with Trademarks Registry.***

Our Company's name or logo ‘’ is not a registered trademark with Trademarks Registry as on date. We sell our organic chemical products in the name of “Archit Organosys”. As such, we do not enjoy the statutory protections accorded to a registered trademark as on date. There can be no assurance that we will be able to register our trade name, brand name or the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all. If we fail to successfully obtain registration of our logo, we may have to change our logo leading to loss of recognition created by this logo. Any such restriction could have an adverse effect on our business, financial condition and results of operations.

RISKS SPECIFIC TO THE PROJECT

- 27. *We are, as on date of this Letter of Offer, in the process of obtaining certain licenses or approvals for the Bhavnagar Facility towards which funds are being raised through the Issue. Any delay or an inability to obtain approvals may adversely impact our ability to execute the project and, consequently, have a detrimental impact on our financial condition.***

As of the date of this Letter of Offer, we have obtained relevant certification for setting up of the manufacturing facilities at Bhavnagar, however, we are yet to reach the stage of commencement of actual production and hence, application for certain licenses/approvals shall be made before the commencement of actual production. If we are unable to procure these approvals on time, or at all, we may be unable to commence actual production at Bhavnagar according to our projected timelines or at all. Our inability to commence actual production may have an adverse effect on our financial condition. For further details, please see the chapter entitled ‘Government and Other Statutory Approvals’ on page 171 of this Letter of Offer.

- 28. *Our Company has not placed orders for some of the plant and machineries. In case of any escalation in prices of these machineries, our total project cost may increase which in turn will adversely affect our Company's financials.***

The Net Proceeds of this Issue are proposed to partly fund the proposed manufacturing facilities at Bhavnagar as explained in the Chapter titled “Objects of the Issue” beginning on page 56 of this Letter of Offer. As on December 31, 2016, our Company has made the payments of ₹ 1,991.25 Lakhs towards supply of such machineries out of term loan availed from Union Bank of India, proceeds from the equity shares issued under preferential allotment, internal accruals and unsecured loans.. The Company is in the process of acquiring plant

and machinery amounting to ₹ 585.40 Lakhs which shall be financed from the proceeds of the issue. Any delay in placing the orders or procurement for remaining machinery may result in a delay in implementing the proposed manufacturing facilities. Consequently, we may have to purchase such remaining machineries at a higher price affecting the project cost which may have an adverse effect on our Company's financials and profitability. For further details please refer to Chapter titled "*Objects of the Issue*" beginning on page 56 of this Letter of Offer.

- 29. *Our Company has availed unsecured loan aggregating ₹ 729.01 Lakhs, as of December 31, 2016, from the Promoters, group entities and others, some of which are repayable on demand. The portion of the issue proceeds is proposed to be utilised to repay the unsecured loans from the Promoters.***

As on December 31, 2016, our Company has availed unsecured loan of ₹ 729.01 Lakhs from the Promoters, and others, some of which are repayable on demand and any demand for repayment may adversely affect our cashflow. In the event that the Promoters or other lenders from whom we have availed unsecured borrowings, call in such loans in future, we would need to find alternative sources of financing, which may not be available on commercially reasonable terms or at all. The part of the Net Proceeds of the Issue is proposed to be utilised to repay the existing unsecured loans from the Promoters. For further details please refer to Chapter titled "*Objects of the Issue*" beginning on page 56 of this Letter of Offer.

- 30. *The completion of the proposed manufacturing facilities is dependent on performance of various external agencies and any shortfall in the performance of these external agencies may adversely affect our expansion plans.***

The completion of setting up of the Bhavnagar Facility is dependent on performance of various external agencies, which are responsible for construction of buildings, installation and commissioning of plant and machinery and supply and testing of equipment. We cannot assure you that the performance of external agencies will meet the required specifications or performance parameters. If the performance of these agencies is inadequate in terms of the requirements, this may result in incremental cost and time overruns, which in turn may adversely affect our proposed manufacturing facilities.

- 31. *Our agreements with lender for financial arrangements contain restrictive covenants for certain activities, it might impede our growth plans.***

Our Company has entered into agreements with Union Bank of India for long term borrowings and are subject to certain restrictive covenants. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, further expansion of business, which require our Company to obtain prior approval of the lenders for any of the above activities. Defaults under one or more of our Company's financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, results of operations and financial condition.

Further, our ability to make payments on our indebtedness will depend on our future performance and our ability to generate cash, which to a certain extent is subject to general economic, financial, competitive, legislative, legal, regulatory and other factors, many of which are beyond our control. If our future cash flows from operations and other capital resources are insufficient to pay our debt obligations, meet our contractual obligations, or to fund our other liquidity needs, we may be forced to sell assets or attempt to restructure or refinance our existing indebtedness. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments may restrict us from adopting some of these alternatives. In addition, any failure to make payments of interest and principal on our outstanding indebtedness on a timely basis would likely result in a reduction of our creditworthiness. Further, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing. Any of these circumstances or other consequences could adversely affect our business, prospects, results of operations and financial condition.

- 32. *The completion of our proposed manufacturing facilities is dependent on timely disbursements of funds from our lenders and any delay may adversely affect our expansion plan.***

Our Company has entered into agreements with Union Bank of India for long term borrowings. The funds may not be disbursed timely as per disbursement schedule, or at all. Any delay in timely disbursements of funds may result in incremental cost and delay in implementing the proposed expansion. For further details in relation to terms and conditions of loan facility obtained from Union Bank of India please refer to Chapter titled “*Financial Indebtedness*” beginning on page 159 of this Letter of Offer.

- 33. *The Objects of this Issue are based on the internal estimates of our management, and have not been appraised by any bank or financial institution. The deployment of funds in the project is entirely at our discretion and as per the details mentioned in section titled "Objects of the Issue".***

Our funding requirements, the funding plans and the deployment of the proceeds of the Issue are based on our management estimates and have not been appraised by any bank or financial institution. The deployment of funds in the manufacturing facilities at Bhavnagar is entirely at our own discretion and the same will not be monitored by any external agency. We may have to revise our management estimates from time to time and consequently our funding requirements may also change. The estimates contained in this Letter of Offer may exceed the value that would have been determined by third party appraisals, which may require us to reschedule the deployment of funds proposed by us and may have a bearing on our expected revenues and earnings.

- 34. *The deployment of the issue proceeds is entirely at the discretion of the Company and is not subject to any monitoring by any independent agency.***

The SEBI ICDR Regulations stipulates the appointment of monitoring agency only where the issue size is in excess of ₹50,000 Lakhs. Since the Issue is for less than ₹50,000 Lakhs, we will not be appointing a monitoring agency and the deployment of Issue Proceeds as stated in chapter entitled ‘*Objects of the Issue*’ on page 56 of this Letter of Offer will not be monitored by an independent agency.

RISK FACTORS IN RELATION TO THE ISSUE

- 35. *You will not be able to immediately sell any of the Rights Shares you purchase in this Issue on the Stock Exchanges.***

Under the SEBI ICDR Regulations, our Company is permitted to allot Rights Shares within fifteen (15) days of the Issue Closing Date. Consequently, the Rights Shares you purchase in the Issue may not be credited to your dematerialized account with Depository Participants until fifteen (15) days of the Issue Closing Date.

- 36. *There is no guarantee that the Rights Shares issued pursuant to the Issue will be listed on the BSE in a timely manner or at all.***

In accordance with Indian law and practice, permission for listing of the Rights Shares issued pursuant to the Issue will not be granted until after such Rights Shares have been issued and allotted. Such approval will require all other relevant documents authorizing the issuing of Rights Shares to be submitted. There could be a failure or delay in listing these Rights Shares on the BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Rights Shares.

- 37. *Shareholders may be subject to Indian taxes arising out of capital gains on sale of the Rights Shares.***

Capital gains arising from the sale of the Equity Shares of a company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than twelve (12) months will not be subject to capital gains tax in India if the STT has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of equity shares held for more than twelve (12) months to an Indian resident, which are sold other than on a recognized stock exchange and as a result of which no STT has been paid, will be subject to capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of twelve (12) months or less will be subject to capital gains tax in India. Capital gains arising from the sale of the Rights Shares of our

Company will be exempt from taxation in India in cases where an exemption is provided under a treaty between India and the country of which the seller is a resident.

Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gain upon a sale of the Rights Shares. For further details, please refer to the Chapter titled "*Statement of Tax Benefits*" beginning on page 69 of this Letter of Offer.

EXTERNAL RISK FACTORS

38. *Exchange rate fluctuations may affect our Company's business.*

A substantial portion of our net revenue is in Foreign Currency. Although our Company can hedge a portion of foreign exchange position through forward exchange contracts and derivatives, our Company may still be affected by fluctuations in exchange rates between the Indian rupee and foreign currencies. Any significant fluctuation in exchange rates may therefore materially affect our profitability.

39. *The proposed new taxation system could adversely affect the Company's and its Group Entities' business.*

The Government has proposed three major reforms in Indian tax laws, namely the goods and services tax, the direct taxes code and provisions relating to general anti-avoidance rules ("GAAR"). With regard to the implementation of the direct tax code, the Government has not specified any timeline for their implementation. Honorable Finance Minister indicated in his recent announcement that the goods and services tax will be implemented from July 1, 2017. The goods and services tax would replace the indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state value-added tax, surcharge and excise currently being collected by the central and state governments. The direct taxes code aims to reduce distortions in tax structure, introduce moderate levels of taxation, expand the tax base and facilitate voluntary compliance. It also aims to provide greater tax clarity and stability to investors who invest in Indian projects and companies, as well as clarify the taxation provisions for international transactions. It aims to consolidate and amend laws relating to all direct taxes such as income tax, dividend distribution tax, fringe benefit tax and wealth tax in order to facilitate voluntary compliance.

With regard to GAAR, the provisions have been introduced by the Finance Act, 2012, and were scheduled to come into effect from April 1, 2013. However, in the Union Budget 2016, it was announced that modified provisions of GAAR will come into effect from the beginning of Fiscal Year 2017.

The GAAR provisions are intended to catch arrangements declared as "impermissible avoidance arrangements", which is defined in the Income Tax Act as any arrangement, the main purpose or one of the main purposes of which is to obtain a tax benefit. If GAAR provisions are invoked, then the tax authorities will have wide powers, including the denial of tax benefit or the denial of a benefit under a tax treaty. As the taxation system is intended to undergo a significant overhaul, the consequential effects on the Company cannot be determined as at the date of this Letter of Offer and there can be no assurance that such effects would not adversely affect the Company's or its Group Entities' business(es), financial condition(s), results of operations and the trading price of the Rights Equity Shares.

40. *Our ability to freely raise foreign capital may be constrained by Indian law.*

As an Indian company, the Company is subject to foreign exchange management regulations that regulate borrowing in foreign currencies. Such regulatory restrictions limit the Company's financing sources and hence could constrain its ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, there can be no assurance that the required approvals will be granted on favourable terms or at all. Limitations on raising foreign debt may have an adverse effect on the Company's business, financial condition and results of operations.

- 41. *Public companies in India, including the Company, may be required to prepare financial statements under IFRS or a variation thereof, the Indian Accounting Standards (“Ind AS”). The Company may be adversely affected by this transition to Ind AS.***

The MCA, pursuant to a notification dated February 16, 2015, has issued the Companies (Indian Accounting Standards) Rules, 2015 which lay down a roadmap for companies other than insurance companies, banking companies and non-banking finance companies for the implementation of Ind AS converged with IFRS. Accordingly companies in India, including the Company, having a net worth of more than ₹ 500 crores are mandatorily required to prepare annual financial statements under Ind AS from the financial year ending on March 31, 2017. Additionally, Ind AS has fundamental differences with IFRS and therefore financial statements prepared under Ind AS may be substantially different from financial statements prepared under IFRS. The Company cannot assure investors that its financial condition, results of operations, cash flow or changes in shareholders’ equity will not appear materially different under Ind AS from that under Indian GAAP or IFRS. As the Company has adopted the Ind AS reporting, it may encounter difficulties in the on-going process of implementing and enhancing its management information systems. There can be no assurance that the adoption of Ind AS will not adversely affect the Company’s reported results of operations or financial condition.

- 42. *Global economic downturn, adverse market conditions and a slowdown in the economic growth in India could cause the business of our Company to suffer.***

The developed economies of the world viz. U.S., Europe, Japan and others are in midst of a downturn affecting their economic condition and markets general business and consumer sentiment has been adversely affected due to the global slowdown and there can be no assurance whether the developed economies or the emerging market economies will see good economic growth in the near future. Consequently, this has also affected the global stock and commodity markets. The performance and growth of our Company is directly related to the performance of the Indian economy. The performance of the Indian economy is dependent among other things on the interest rate, political and regulatory actions, liberalization policies, commodity and energy prices etc. A change in any of the factors would affect the growth prospects of the Indian economy, which may in turn adversely impact the results of operations, and consequently the price of the Equity Shares of our Company.

- 43. *Any downgrading of India’s sovereign debt rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India’s sovereign credit ratings for domestic and international debt by international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our capital expenditure plans, business and financial performance and the price of our Equity Shares.

- 44. *Investors may be adversely affected due to retrospective tax law changes by the Indian government affecting our Company.***

Certain recent changes to the Income Tax Act provide that income arising directly or indirectly through the sale of a capital asset of an offshore company, including shares, will be subject to tax in India, if such shares derive indirectly or directly their value substantially from assets located in India. The term ‘*substantially*’ has not been defined under the Income Tax Act and therefore, the applicability and implications of these changes are largely unclear. Due to these recent changes, Investors may be subject to Indian income taxes on the income arising directly or indirectly through the sale of the Equity Shares. In the past, there have been instances where changes in the Income Tax Act have been made retrospectively and there cannot be an assurance that such retrospective changes will not happen again.

- 45. *Political instability or significant changes in the economic liberalisation and deregulation policies of the Government or in the government of the states where the Company operates could disrupt its business.***

The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. The Company’s businesses, and the market price and liquidity of its securities may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments in or affecting India. In recent years, India has been following a course of economic liberalisation and the Company’s business could be significantly

influenced by economic policies followed by the Government.

However, there can be no assurance that such policies will continue in the future. The rate of economic liberalisation could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

46. *Natural disasters could have a negative impact on the Indian economy and damage the Company's facilities.*

The Company's manufacturing facilities are vulnerable to natural disasters. In addition, natural disasters such as floods, earthquakes, epidemics or famines have in the past had a negative impact on the Indian economy. If any such event were to occur, the Company's business could be affected due to the event itself or due to its inability to effectively manage the effects of the particular event. Potential effects include the damage to infrastructure and the loss of business continuity, business information or inventories of raw materials or finished goods. In addition, some of the Company's facilities are more suitable or possess specialised equipment necessary to work on specialised products that its other locations lack. If work at one of these facilities is disrupted due to the occurrence of any such event, it may be impractical or impossible to transfer such specialised work to another facility without significant costs and delays. Thus, any disruption in operations at a facility possessing specialised equipment could have a material adverse effect on the Company's ability to provide products to its customers, and thus materially and adversely affect the Company. In the event that the Company's facilities are affected by any of these factors, its operations may be significantly interrupted, which may have a material adverse effect on its business, results of operations, financial condition and prospects.

47. *The Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 has effected significant changes to the existing Indian Company law framework, which may subject us to higher compliance requirements and increase our compliance costs.*

The Companies Act, 2013 has been recently notified, except for certain provisions. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, and in certain cases, introduced certain requirements which did not have corresponding provisions under the Companies Act, 1956, such as provisions related to private placement of securities, disclosures in prospectus, corporate governance norms, accounting policies and audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by Shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and Key Management Personnel from engaging in forward dealing. Accordingly, we may face challenges in interpreting and complying with such provisions due to the limited jurisprudence on them. In the event our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps.

In addition, pursuant to the corporate social responsibility (CSR) provisions contained in the Companies Act, 2013 our Company may also need to spend, in each financial year, at least two per cent (2%) of our average net profits during the three (3) immediately preceding financial years towards one of the specified CSR activities.

To ensure compliance with the requirements of the Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

48. *Significant differences exist between Indian GAAP and other accounting principles, such as IFRS, which investors may be more familiar with and may consider material to their assessment of the Company's financial condition.*

As stated in the reports of the independent auditors included in this Letter of Offer, the Company's financial statements are prepared and presented in conformity with Indian GAAP, which has been consistently applied during the periods stated, except as provided in such report. No attempt has been made to reconcile any of the information given in this Letter of Offer to any other principles or to base it on any other standards. Indian GAAP differs in certain significant respects from IFRS and other accounting principles and auditing standards

with which prospective investors may be familiar in other countries. If the financial statements of the Company were to be prepared in accordance with such other accounting principles, its results of operations, cash flows and financial position may be substantially different. Prospective investors should review the accounting policies applied in the preparation of the Company's financial statements and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar.

Overview of Indian Economy

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). According to IMF World Economic Outlook Update (January 2016), the Indian economy is expected to grow at 7.00-7.75% during FY 2016-17, despite the uncertainties in the global market. India's foreign exchange reserves stood at USD 360.00 billion by end of March 2016, as compared to USD 342.00 billion last year, according to data from the Reserve Bank of India (RBI).

The services sector of India contributes 65% to the Indian GDP while the manufacturing & industrial sector contributes 18% and the agriculture sector contributes 17%. The Gross Fixed Capital Formation (GFCF) at current prices stood at Rs 0.89 trillion (USD 131.36 billion) in the first quarter of 2016 while India's exports stood at USD 21.68 billion in July 2016. India's principal export partners are US, Germany, UAE, China, Japan, Thailand, Indonesia and European Union. The cumulative FDI inflows from April 2000 to March 2016 are USD 288.513 billion wherein Mauritius (33.24%), Singapore (15.90%), UK (8.01%), Japan (7.27%), USA (6.22%) and Netherlands (6.00%) were the principal investing nations channelling the investment into sectors such as Services (17.60%), Construction Development (8.38%), Computer Software and Hardware (7.28%), Telecommunications (6.37%), Automobile (5.22%), Drugs and Pharmaceuticals (4.80%), Chemical (4.12%) and Trading (4.12%)

Organic Chemicals

Introduction

Organic chemicals are a significant part of chemicals industry. Availability of natural gas for use as feedstock is a critical part of the production process for organics chemicals. For example, formaldehyde and acetic acid are important methanol derivatives and are used in numerous industrial applications. Similarly, Phenol is an aromatic compound and derived from Cumene, a benzene and propylene derivative.

Indian Organic Chemical Industry

Five major organic chemicals produced in India are Methanol, Aniline and its derivatives Formaldehyde, Acetic Acid and Phenol. Together, they contribute to 2/3rd of Indian basic organic chemical industry. The balance 1/3rd of the organic chemical consumption in the country is accounted for by several other wide varieties of chemicals like chloro methanes and ethyl acetates.

Market Trends

- Initial trends (Between FY 2001 and FY 2010) indicated a shift in production of bulk chemicals from OECD countries to economies in transition. However, the analysis indicates that few countries with economies in transition are increasingly moving towards specialty and fine chemicals. This gradual shift is clearly visible in countries like China, India and Middle East.

- Consistent with trends from the past decade, China is expected to record highest annual growth rate in the bulk chemical production. On average China's chemical production is expected to grow at 10% between FY 2014 and FY 2021.
- Technology transfer happening from developed economies to economies in transition as a result of increased M&A activities, JVs and acquisitions has helped these economies play a larger role in the global market.
- Domestic utilization rates are expected to reach high levels of 90 % by the end of 2018, given the healthy growth in the end-user market.
- Government of India continues to provide duty protection to domestic manufacturers. Historically, the Government has also levied anti-dumping duty on import of phenol to protect domestic players from imports. In Oct 2008, an anti-dumping duty was levied on imports from Singapore, South Africa and EU for a period of 5 years. In 2010, anti-dumping duty of up to USD 547/ tonne was imposed on imports from Japan and Thailand for a period of five years. In 2014, anti-dumping duty of up to USD 80/ton was imposed on imports from China and up to USD 194/ton was imposed on imports from any country other than China for a period of six months.

Key Challenges

- Lack of world class infrastructure: Given the poor infrastructure with lack of adequate facilities at ports and railway terminals and poor pipeline connectivity, domestic manufacturers will continue facing difficulty in procuring raw materials at a cost competitive with the global peers.
- Power: Uninterrupted power supply plays a major role in the efficient production of chemicals. In India, power supply has not increased at the same rate as demand, leading to interruption in the supply. India's distribution losses which are well above the global benchmarks are only compounding the problem. Large Indian chemical companies have started investing in captive power plants to ensure continuous supply of power to their plants. But this problem is plaguing the small & medium players of the industry. Thus, uninterrupted power supply is a challenge that confronts the bulk chemical industry.
- Logistic Issues: Indian bulk chemical industry is mainly concentrated in the west in Gujarat. Though the manufacturers enjoy easy access to raw materials, they face difficulty in supplying to end-use industries which are located in southern & eastern regions. For example, soda ash manufacturers are located in Gujarat, whereas 40% of the end use industries (glass, detergent and soap units) are located in south. This increases the transportation cost, thus making imports cheaper when compared to internal transport. (USD 50 per metric tonne (PMT) freight cost for transportation from western part to eastern part compared to USD 25 to USD 30 PMT average freight for imports).
- Lack of cheaper raw material availability: Feedstock (naphtha and natural gas) and power are critical inputs for both organic & inorganic chemicals industry. Costs of these raw materials are high in India compared to countries like China, Middle East and other South East Asian countries such as Thailand and Indonesia.
- No domestic price discovery: Domestic prices of organic chemicals are highly correlated with international prices. Given the small scale of domestic operations, local manufacturers are more influenced by global demand and supply forces.
- Large global capacity additions: Apart from the current oversupply in global markets, there is another cause of concern for domestic manufacturers, with further large capacity additions happening in global markets. For example, globally, methanol industry is expected to witness excess capacity in the future due to a spate of capacity additions in gas rich countries such as US, Middle East and Russia.

Key Opportunities

- Improved feedstock supply: Domestic organic chemicals players don't have the advantages of backward integration and hence, they lack pricing flexibility. However, given the new finds of natural gas reserves in the country, domestic manufacturers will be able to get supply of feedstock at stable prices.

- Wider product portfolio: Commodity chemicals companies can improve their product portfolio by adding specialty chemicals such as polymers additives, water treatment chemicals, lubricating additives, etc. This will help in improving their margins but requires significant R&D efforts.
- Forward integration: Petrochemical companies producing benzene and propylene can look for forward integration opportunity given the demand-supply deficit in phenol market. Similarly, an opportunity exists for companies with better access to natural gas supply to venture into the methanol market facing continuous supply deficit.
- Outbound approach: Even successful companies from west are shifting their base to resource rich nations like Saudi Arabia, Qatar, Russia, etc. Indian organic chemical companies may also explore opportunities outside the country either through Greenfield or brownfield projects.
- Setting up of Chemical Parks or Mega Chemical Estates to Make in India: In order to address the issue of capacity expansion and for creation of common infrastructure, the chemical industry, with support of Government could establish exclusive Chemical Parks - a concept similar to the one set up in Germany. Each of the German chemical parks and sites has its particular strengths which are reflected in its individual portfolio of services. The object of these initiatives is to support the chemical sites in their respective regions and to make them better known internationally. To this end, the industries work closely with the governments of the individual states, municipalities, universities and economic development agencies under public-private partnership model.
- Coal to Chemical opportunity: With no improvements in sight in the domestic production of natural gas and crude oil, Indian bulk chemical manufacturers should actively pursue the coal to chemical process to ramp up their manufacturing capacities. Government should take cognizance of the issue and make policy changes to encourage this route of bulk chemical manufacturing.

Future Outlook

While domestic demand of basic organic chemicals is expected to grow at 9% in 2014-18, mainly led by the growth in the end-user market, domestic utilization rates of the Indian plants are expected to be around 90% by the end of 2018. Imports as a percentage of domestic consumption is expected to widen from the existing 11% to 20% by the end of 2018. According to a research report, the India organic chemical industry will grow at a considerable CAGR rate thus exceeding a target of 2,418.2 TMT by 2019 due to the increasing number of end user industries and rising number of PCPIRS.

Global Chemical Industry

Overview

The chemical industry includes basic and specialty chemicals, consumer care products, agrochemicals and pharmaceuticals and is also a major economic force which employs millions of people around the world, and generates billions of dollars in shareholder value and tax revenues for governments. It accounts for about 7% of global income and 9% of international trade. A variety of global economic and regulatory forces influence changes in chemical production, transport, import, export, use and disposal over time. In response to the growing demand for chemical-based products and processes, the international chemical industry has grown dramatically since the 1970s. Global chemical output was valued at USD 171.00 billion in 1970; by 2010, it had grown to USD 4.12 trillion.

Sub-Sectors

Bulk chemicals (also referred to as base chemicals) compose the first tier of production. These include both organic chemicals (also referred to as petrochemicals) and basic inorganics. The bulk chemicals are sold within the chemical industry and to other industrial sectors, and are used to make an enormous variety of downstream products. The organic bulk chemicals can, in turn, be considered in several tiers. The first tier consists of a handful of high volume chemicals: the olefins (ethylene, propylene and butadiene), the aromatics (benzene, toluene and xylenes) and methanol.

The second tier consists of a larger number of chemicals made from these starting materials, sometimes in combination with inorganic chemicals. A number of inorganic bulk chemicals are used primarily to produce

agricultural inputs. Others are added to basic organic chemicals, either to facilitate chemical reactions, or as additions to the product (for example, halogens are added to basic organic chemicals to create a wide variety of halogenated compounds).

Specialty chemicals are smaller-volume, more specialized chemicals. They include “adhesives and sealants, catalysts, coatings, electronic chemicals, institutional and industrial cleaners, plastic additives, water management chemicals,” and others. Agricultural chemicals include pesticides and fertilizers. Some classification systems include them within the category of specialty chemicals.

Pharmaceuticals are sometimes grouped together with agricultural chemicals in a category of “life sciences chemicals.” Biocides include both pesticides and antimicrobials. Antimicrobials may be used for pharmaceutical applications, or for industrial applications. In the latter instance, they may be grouped under the heading of specialty chemicals.

Global Scenario

The global chemicals industry has grown steadily over the past several decades. In the decade 2000 to 2010, the Global Chemical Production Regional Index calculated by the American Chemistry Council shows that total production increased 54%. Certain countries like China experienced rapid growth in their production which nearly tripled over that time period. In 2010, China was the largest chemical producing country, with sales of USD 754 billion.

The OECD countries as a group still account for the bulk of world chemical production, but developing countries and countries with economies in transition are increasingly significant. An analysis by OECD notes that while annual global chemical sales doubled over the period 2000 to 2009, OECD’s share decreased from 77 % to 63 % and the share of the BRIICS countries (Brazil, Russia, India, Indonesia, China and South Africa) increased from 13 % to 28 %.

Key Drivers

A variety of global economic forces influence changes in chemical production, use and disposal over time. Chemical use is influenced both by countries’ domestic needs, and by global trade. Factors influencing the location of chemical use in manufacturing include proximity to raw materials, proximity to final markets, labour costs, and a range of other factors. For certain categories of manufacturing, proximity to raw materials can have a significant effect on costs of production and as a result, can influence chemical production near the source.

Indian Chemical Industry

Overview

In terms of value and production volume, the Indian chemical industry is the 3rd largest producer in Asia and 6th by output in the world. Indian chemical industry is expected to grow at 11 per cent p.a. to reach size of USD 224.00 billion by 2017. In 2015, India chemicals industry had a market size of USD 144.00 billion. The chemical industry in India is a key constituent of Indian economy, accounting for about 2.11 per cent of the GDP. India accounts for approximately 16 per cent of the world production of dyestuff and dye intermediates, particularly for reactive acid and direct dyes. India is currently the world’s third largest consumer of polymers and third largest producer of agrochemicals. India specialty chemical market is expected to reach USD 70.00 billion by 2020. Value of India’s exports of inorganic chemicals have increased from USD 1.40 billion in FY 2014 to USD 0.70 billion in FY2015, while the organic chemical market has reached USD 5.90 billion in FY 2015 from USD 12.04 billion in FY 2014.

Characteristics of the Indian Chemical Industry

Strong economic growth and rise in per-capita income has meant a steady increase in demand for chemicals, which is expected to clock a growth of 10-13 per cent over the coming years. The industry has left behind a low-growth and regulated environment to emerge more mature and a strong government support towards R&D would benefit the sector.

The below figure depicts the significant position of the chemical sector in the economy:

Domestic & External Demand: Key Growth Drivers

Total production in the Indian chemical industry was 9,107 MT in FY 2011 and had reached upto 9,627 MT in FY 2014 clocking a CAGR of 1.90 % from FY 2011-14, whereas in FY 2015 (upto September 2014), the production had reached at 4,794 MT. Favourable demographics and strong economic growth are driving demand for chemicals wherein external demand and specialty chemicals have also contributed strongly to the growth of the industry. Additionally, India's growing per capita consumption and demand for agriculture-related chemicals offers huge scope of growth for the sector in the future.

Exports of the Indian chemical industry stood at USD 4.90 billion for FY 2016 wherein the exports grew from USD 12.40 billion in FY 2013 to USD 12.70 billion in FY 2015, registering a growth of 0.9 %. During FY 2016, organic chemicals constituted 44.05 % of India's total chemical exports, followed by miscellaneous chemical at 18.45%.

Organic Chemicals

Introduction

Organic chemicals are a significant part of chemicals industry. Availability of natural gas for use as feedstock is a critical part of the production process for organics chemicals. For example, formaldehyde and acetic acid are important methanol derivatives and are used in numerous industrial applications. Similarly, Phenol is an aromatic compound and derived from Cumene, a benzene and propylene derivative.

Indian Organic Chemical Industry

Five major organic chemicals produced in India are Methanol, Aniline and its derivatives Formaldehyde, Acetic Acid and Phenol. Together, they contribute to 2/3rd of Indian basic organic chemical industry. The balance 1/3rd of the organic chemical consumption in the country is accounted for by several other wide varieties of chemicals like chloro methanes and ethyl acetates.

The demand for organic chemicals in India has increased at nearly 7.80 % in 2009-13 to reach 3.60 million tons in 2013. The domestic supply has however grown at a much slower pace and has essentially been stagnant in the last three years. This has resulted in widening of demand supply gap which was primarily bridged through imports. Domestic production has increased at 2.4% per annum and imports grew at a rate of 8.7% between FY 2009 and FY 2013. The stagnation in the domestic production is largely attributed to the large volume imports taking place from countries like China, resulting in low utilization rates of 60%.

Market Trends

- Initial trends (Between FY 2001 and FY 2010) indicated a shift in production of bulk chemicals from OECD countries to economies in transition. However, the analysis indicates that few countries with economies in transition are increasingly moving towards specialty and fine chemicals. This gradual shift is clearly visible in countries like China, India and Middle East.
- Consistent with trends from the past decade, China is expected to record highest annual growth rate in the bulk chemical production. On average China's chemical production is expected to grow at 10% between FY 2014 and FY 2021.
- Technology transfer happening from developed economies to economies in transition as a result of increased M&A activities, JVs and acquisitions has helped these economies play a larger role in the global market.
- Domestic utilization rates are expected to reach high levels of 90 % by the end of 2018, given the healthy growth in the end-user market.
- Government of India continues to provide duty protection to domestic manufacturers. Historically, the Government has also levied anti-dumping duty on import of phenol to protect domestic players from imports. In Oct 2008, an anti-dumping duty was levied on imports from Singapore, South Africa and EU for a period of 5 years. In 2010, anti-dumping duty of up to USD 547/ tonne was imposed on imports from Japan and Thailand for a period of five years. In 2014, anti-dumping duty of up to USD 80/ton was imposed on imports from China and up to USD 194/ton was imposed on imports from any country other than China for a period of six months.

Key Challenges

- Lack of world class infrastructure: Given the poor infrastructure with lack of adequate facilities at ports and railway terminals and poor pipeline connectivity, domestic manufacturers will continue facing difficulty in procuring raw materials at a cost competitive with the global peers.
- Power: Uninterrupted power supply plays a major role in the efficient production of chemicals. In India, power supply has not increased at the same rate as demand, leading to interruption in the supply. India's distribution losses which are well above the global benchmarks are only compounding the problem. Large Indian chemical companies have started investing in captive power plants to ensure continuous supply of power to their plants. But this problem is plaguing the small & medium players of the industry. Thus, uninterrupted power supply is a challenge that confronts the bulk chemical industry.
- Logistic Issues: Indian bulk chemical industry is mainly concentrated in the west in Gujarat. Though the manufacturers enjoy easy access to raw materials, they face difficulty in supplying to end-use industries which are located in southern & eastern regions. For example, soda ash manufacturers are located in Gujarat, whereas 40% of the end use industries (glass, detergent and soap units) are located in south. This increases the transportation cost, thus making imports cheaper when compared to internal transport. (USD 50 per metric tonne (PMT) freight cost for transportation from western part to eastern part compared to USD 25 to USD 30 PMT average freight for imports).
- Lack of cheaper raw material availability: Feedstock (naphtha and natural gas) and power are critical inputs for both organic& inorganic chemicals industry. Costs of these raw materials are high in India compared to countries like China, Middle East and other South East Asian countries such as Thailand and Indonesia.
- No domestic price discovery: Domestic prices of organic chemicals are highly correlated with international prices. Given the small scale of domestic operations, local manufacturers are more influenced by global demand and supply forces.
- Large global capacity additions: Apart from the current oversupply in global markets, there is another cause of concern for domestic manufacturers, with further large capacity additions happening in global markets. For example, globally, methanol industry is expected to witness excess capacity in the future due to a spate of capacity additions in gas rich countries such as US, Middle East and Russia.

Key Opportunities

- Improved feedstock supply: Domestic organic chemicals players don't have the advantages of backward integration and hence, they lack pricing flexibility. However, given the new finds of natural gas reserves in the country, domestic manufacturers will be able to get supply of feedstock at stable prices.
- Wider product portfolio: Commodity chemicals companies can improve their product portfolio by adding specialty chemicals such as polymers additives, water treatment chemicals, lubricating additives, etc. This will help in improving their margins but requires significant R&D efforts.
- Forward integration: Petrochemical companies producing benzene and propylene can look for forward integration opportunity given the demand-supply deficit in phenol market. Similarly, an opportunity exists for companies with better access to natural gas supply to venture into the methanol market facing continuous supply deficit.
- Outbound approach: Even successful companies from west are shifting their base to resource rich nations like Saudi Arabia, Qatar, Russia, etc. Indian organic chemical companies may also explore opportunities outside the country either through Greenfield or brownfield projects.
- Setting up of Chemical Parks or Mega Chemical Estates to Make in India: In order to address the issue of capacity expansion and for creation of common infrastructure, the chemical industry, with support of Government could establish exclusive Chemical Parks - a concept similar to the one set up in Germany. Each of the German chemical parks and sites has its particular strengths which are reflected in its individual portfolio of services. The object of these initiatives is to support the chemical sites in their respective regions and to make them better known internationally. To this end, the industries work closely with the governments of the individual states, municipalities, universities and economic development agencies under public-private partnership model.
- Coal to Chemical opportunity: With no improvements in sight in the domestic production of natural gas and crude oil, Indian bulk chemical manufacturers should actively pursue the coal to chemical process to ramp up their manufacturing capacities. Government should take cognizance of the issue and make policy changes to encourage this route of bulk chemical manufacturing.

Future Outlook

While domestic demand of basic organic chemicals is expected to grow at 9% in 2014-18, mainly led by the growth in the end-user market, domestic utilization rates of the Indian plants are expected to be around 90% by the end of 2018. Imports as a percentage of domestic consumption is expected to widen from the existing 11% to 20% by the end of 2018. According to a research report, the India organic chemical industry will grow at a considerable CAGR rate thus exceeding a target of 2,418.2 TMT by 2019 due to the increasing number of end user industries and rising number of PCPIRS.

Our Products

Traded Products

Our Company is engaged in the trading of certain Organic and Inorganic Chemicals, Dyes and Intermediates.

Manufactured Products

Our Company is engaged in the manufacturing of certain Organic Chemicals namely, Monochloroacetic Acid (MCA) and Sodium Monochloro Acetate (SMCA). The details of our products are as under:

Monochloroacetic Acid (MCA):

Monochloroacetic Acid, CClH_2COOH (chloroacetic acid), is a carboxylic acid which is formed by chlorinating acetic acid. It is a colourless, deliquescent crystalline solid with an odour. MCA is highly soluble in water as well as most organic solvents, except carbon tetrachloride. As its structural formula indicates, it is bi functional; with the groups having the possibility of undergoing a reaction.

Pure Monochloroacetic Acid is available in molten state, as flakes or dissolved in water, ethanol and methanol. At room temperature, MCA solids have the appearance of a hygroscopic crystalline substance with a characteristic acidic odour. Monochloroacetic Acid 80% solution (above 18 degrees centigrade) in water and Monochloroacetic Acid molten (above 62 degrees centigrade), is a clear fluid with a characteristic acidic odour.

MCA is used as a versatile intermediate in the manufacturing of various agrochemicals viz. 2, 4-D, Glyphosate etc. It is widely used as a main raw material for various pharmaceuticals viz. Ibuprofen, Diclofenac, etc. & in the manufacturing of Carboxy Methyl Cellulose.

Sodium Monochloro Acetate (SMCA):

Sodium Monochloro Acetate (SMCA) is the derivative of Monochloroacetic Acid (MCA) obtained by its neutralization with alkali. This is a versatile product and is used as raw material or intermediate in the manufacture of the following important organic and textile chemicals. - Herbicides such as 2,4D, 2,4,5 Trichlorophenoxyacetic Acid; Sequestering agents such as Sodium salt of Ethylene Diaminetetra acetic Acid (EDTA), Nitroacetic Acid etc.; Sodium Carboxymethyl Cellulose (CMC); Carboxymethyl Starch; Glycolic Acid; Triglycolic Acid; Cyanoacetic Acid and its Esters; Dyes such as Indigo; Substituted Guar Gums.

Sodium Monochloroacetate is a white colour free flowing fine powder with a pungent odour. It is readily soluble in water and available as technically pure grade. It is available as granule and in powder form (of the two forms, granules have better flowing characteristics and reduced caking behavior, making them easier to use.

SMCA is used as in applications to manufacture cosmetics, textiles auxiliaries, dyes, in the gum industries etc.

Our Manufacturing facilities

Our manufacturing facility is located at 25/9/A & B, Phase-III, G.I.D.C., Naroda, Ahmedabad – 382330, Gujarat, India. We have an installed capacity to manufacture 6000 MT p.a. of MCA and 1800 MT p.a. of SMCA. We have made efforts to achieve high standards of quality of the products manufactured. Our manufacturing facility is ISO 9001:2008 certified.

Our Company proposes to set up another manufacturing facility to be located at Narmad RS No. 228/1A Paiki 7/2 Bhavnagar, Gujarat, India. The land is purchased and the Plant is under construction. This proposed new manufacturing facility will add to the production capacity of MCA and SMCA and will also add Chloro Acetyl Chloride (CAC) (“Project-I”) and Polyaluminium Chloride (PAC) (“Project-II”) into our product portfolio, with an installed capacity of 3,000 MT p.a. of CAC and PAC with an installed capacity of 12,000 M.T. p.a. The installed capacity of producing MCA at new unit will be 12,000 MT p.a. and that of SMCA will be 2,400 MT p.a.

Note on Capacity Utilization

The projected capacity utilization of SMCA at Naroda Unit is higher than the average of actual capacity utilization in past three years' by more than 25%. SMCA is a versatile product and our Company expects increase in the demand of SMCA due to its varied application in the growing industries such as cosmetics, textiles auxiliaries, dyes and gum. Further, SMCA is a derivative of MCA. As the Company is expecting to maintain production of MCA utilizing 85% of its capacity, production of SMCA is expected to increase in future.

Manufacturing Process

1. Monochloroacetic Acid (MCA)

Acetic Acid (AA) is reacted with gaseous chlorine in presence of Acetic Anhydride (catalyst) in a chlorinator at elevated pressure & temperature. The resultant mass is then crystallized and further purified by centrifuging to produce a pure form of Monochloroacetic Acid.

2. Sodium salt of Monochloroacetic Acid (SMCA)

SMCA is produced by the reaction of MCA with Soda Ash in a ribbon blender. The resultant mass is dried using tray dryers and then packed.

This includes rules for laying down the quality of environment, standards for emission of discharge of environment pollutants from various sources as given under the Environment (Protection) Rules, 1986, inspection of any premises, plant, equipment, machinery, and examination of manufacturing processes and materials likely to cause pollution.

The **Water (Prevention and Control of Pollution) Act, 1974** (the “Water Act”) aims to prevent and control water pollution by factories and manufacturing units and to maintain and restore the quality and wholesomeness of water. Under the Water Act, any person establishing any industry, operation or process, any treatment or disposal system, using of any new or altered outlet for the discharge of sewage or causing new discharge of sewage, must obtain the consent of the relevant state pollution control board, which is empowered to establish standards and conditions that are required to be complied with.

Every occupier and operator of a facility generating hazardous waste must obtain an approval from the relevant pollution control board. The occupier, the transporter and the operator are liable for damages caused to the environment resulting from improper handling and disposal of hazardous waste. The operator and the occupier of a facility are liable for any fine that may be levied by the relevant state pollution control board with the prior approval of the Central Pollution Control Board.

The **Public Liability Insurance Act, 1991** (the “PLI Act”) imposes liability on the owner or controller of hazardous substances for any damage arising out of an accident involving such hazardous substances. A list of hazardous substances covered by the legislation has been enumerated by the government by way of a notification. Under the law, the owner or handler is also required to take out an insurance policy insuring against liability. The

rules made under the PLI Act mandate that the employer has to contribute towards the Environmental Relief Fund a sum equal to the premium paid on the insurance policies.

It also controls and regulates selected chemicals, commonly known as precursors, which can be used in the illicit manufacture of narcotic drugs and psychotropic substances. Offences under the Narcotic Act are essentially related to violations of the various prohibitions imposed under it, punishable by both imprisonment and monetary fines. The Narcotic Act was amended in 1989 to mandate death penalty for second offences relating to contraventions involving more than certain quantities of specified narcotic drugs and psychotropic substances. Further, an amendment in 2001 was made to ensure that while punishment awarded for drug trafficking was deterrent, sentences awarded to drug addicts were commensurate to the offences committed by them. A subsequent amendment in 2014 has now made it difficult for drug traffickers to acquire property from the income generated by their illegal activities. It has also made enabling provisions for the introduction of an alternate method of obtaining alkaloids of opium through production of concentrate of poppy straw instead of production and processing of opium in the country.

If any such indication exists, the asset's recoverable amount is estimated. An impairment loss is recognised whenever the carrying amount of an asset exceeds its recoverable amount.

After recognition of impairment loss, the depreciation charge for the assets is adjusted in future periods to allocate the asset's revised carrying amount, less its residual value (if any), on straight line basis over its remaining useful life.

(d) Other material pending litigations

1 Original Application No. 74/2009 filed by HDFC Bank Limited ("Applicant") against Archit Organosys Limited (Earlier known as Shri Chlochem Limited) ("Respondent") before the Debt Recovery Tribunal-II ("DRT-II"), Mumbai for the recovery of the amount which is pending as on date.

The Respondent had entered into and executed an ISDA Agreement (International Swaps and Derivatives Association Agreement) dated November 27, 2007 for the purpose of conducting the derivative transactions with the erstwhile Centurion Bank of Punjab Limited (the said bank has been merged with the Applicant i.e. HDFC Bank Limited w.e.f. May 23, 2008). According to Applicant, the Respondent had failed to discharge the liability as per the said Agreement and defaulted in repayment of the finance facility enjoyed and utilized by the Respondent from time to time. Pursuant to this, the Applicant on December 12, 2012, had served a notice on the Respondent calling upon to make payment to the Applicant of outstanding amount of Rs. 1,42,45,334.43 (Rupees One Crore Forty Two Lacs Forty Five Thousand Three Hundred Thirty Four and Forty Three Paise only) together with interest @18% p.a. and charges within 21 days from the date of receipt of notice failing which, it may be deemed that the Respondent is commercially insolvent and is unable to pay its debts which in turn may lead the Applicant, on its sole discretion, to file the Winding Up petition against the Respondent by treating the said notice as a Statutory Notice under Sections 433 and 434 of the Companies Act, 1956.

Subsequently, the Respondent, on December 31, 2012, had made a reply to the notice issued by the Applicant and at the outset, specifically denied the alleged claim considering it as hopelessly time barred and non-establishing and which was raised on purely speculative transactions which are de-hors the law. Respondent also claimed that the proceedings being Original Application No. 74/2009 have already been filed by the Applicant in the Debt Recovery Tribunal-II, Mumbai, which has directed the Applicant to produce the entire original record of FDRs along with necessary details of interest in the DRT which is yet to be complied by the Applicant. As the matter is sub-judice before the DRT and the same is being defended and contested by the Respondent, the Respondent refrained from making any further reply to the notice.

A response to the abovementioned reply was received by the Company on January 21, 2013 where the Applicant referred to a previous correspondence with the Respondent dated February 23, 2010, wherein, it was alleged that the Respondent had admitted its liability to the Applicant.

Subsequently, a reply dated February 7, 2013 was issued by the Respondent to the Applicant whereby the Respondent re-iterated the sub-judice nature of the matter pertaining to any liability owed by it to

the Applicant. Further, a copy of the letter dated February 23, 2010 was attached to the reply clarifying to the Applicant that the said letter had been issued by the Respondent in context of the alleged claim raised in Original Application No. 74 of 2009 and the contents of which, could in no manner, be interpreted to mean an admission of its liability by the Respondent.

The said application is pending as on date.

2 Company Petition No. 69 of 2013 filed by HDFC Bank (“Petitioner”) Limited against Archit Organosys Ltd. (Earlier known as Shri Chlochem Limited) (“Respondent”) before the High Court of Gujarat for winding-up of the Respondent, which is pending as on date.

The Petitioner has filed Company Petition No. 69 of 2013 for initiating winding up of the Respondent alleging insolvency of the latter. The Respondent is contesting the matter and no order has been filed with respect to winding-up. The matter is pending and has been ordered to be listed for hearing on March 27, 2017.
